### OTHER INFO

The work in the vineyards is as natural as possible in accordance with the criteria of organic agriculture and the domaine received official certification from the 2008 vintage. No chemical fertilizers, herbicides or pesticides are used to treat the soils or the vines. Ploughing and weeding are practiced according to the blocks and the yields desired. Vines are treated with copper sulphate and sulphur occasionally blended with a nettle infusion/tea (4 to 5 times a year). Only organic fertilizer is used. Vines are 40 years old.
